DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a MδLK8 recombinant expression vector.

Group II, claim(s) 6-10, drawn to a method for preparing a transformant.

Group III, claim(s) 11-18, drawn to a method for mass-production of LK8 protein.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature is a MδLK8 recombinant expression vector. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art.

The claims lack unity of invention because Applicants' invention is obvious.

WO0119868 and Lee et al teach a MδLK8 recombinant expression vector.

WO0119868 teaches LK8 protein consisting of amino acid sequence of the human apolipoprotein(a) kringle domain V38; a cDNA sequence encoding said LK8 protein

Application/Control Number: 10/587,155

Art Unit: 1636

(SEQ ID NO: 1); a recombinant expression vector comprising said cDNA; a recombinant microorganism transformed with said expression vector; and a method for producing said LK8 protein. Lee et al disclose a delta-integration vector for the insertion of an inducible expression cassette and a bacterial neomycin resistance gene into the genome of Saccharomyces cerevisiae via homologous recombination; and a selection of the transformed cell containing integration by resistance to G418. Claim 1 relates to a recombinant expression vector containing LK8 expression cassette comprising GALI promoter, alpha-factor secretion sequence, LK8 cDNA and CYC1 terminator, deltasequence for the multiple insertion, and a neomycin resistant gene for the selection; and a Saccharomyces cerevisiae strain transformed with said expression vector. WO0119868 discloses a cDNA sequence encoding LK8 protein and Lee et al disclose a delta-sequence for the multiple insertion and a neomycin resistant gene for the selection. It is predictable to constitute an expression vector comprising LK8 cDNA known in WO0119868 and the delta-sequence and the neo gene known in Lee et al, and this is obvious to a person skilled in the art. Furthermore, one of skill in the art would be motivated to combine the references, because Lee et al teach that direct integration into a host's genome is an effective way to introduce heterologous genes. Said recombinant expression vector and said transformed cell have the same function of overproducing a target protein (LK8 protein) as was expected in WO0119868 and Lee et al. Therefore, claim 1 lacks an inventive step as being obvious in view of WO0119868 and Lee et al.

Page 3

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result

Application/Control Number: 10/587,155 Page 5

Art Unit: 1636

in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHELE K. JOIKE whose telephone number is (571)272-5915. The examiner can normally be reached on M-F, 10:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low can be reached on (571)272-0951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
